All information shown in this table is just an estimation. Time can vary depending on the actual size of the project you are making. Calculations are based on the assumption that you will be knitting at least 10 rows every day. You can decrease knitting time if you decide to knit more than 10 rows a day.

Estimations for mittens and socks are based on the asumption that you will knit one sock or mitt at a time. If you make socks and mittens two at a time, you will decrease knitting time by half (but each round will be twice as long).

For cardigans, use the estimation given for sweaters and add 2 extra days for knitting the button band.
